

WIPCOOL C10B

BATTERY POWERED AIR CONDITIONING WASHING PUMP

The Wipcool C10B cleaning pump is a professional tool for pressure washing of home air conditioners. Pressure can be changed at the touch of one button. It is a convenient solution that will make it possible to properly rinse the evaporator slots. At the same time, there is no risk of damaging the air conditioner components. It is a great tool for cleaning outdoor and indoor units.

The device is supplied with built-in batteries, so you do not have to worry about the lack of availability of a socket. The set also includes Makita and Bosch battery adapters. However, if you have other power tools, you will also find other adapters in our shop that will make it possible to use the batteries already have.

For proper operation, a pressure washer requires a container with water into which the suction hose should be inserted. This allows for comfortable work even without access to running water.

The hose is equipped with a filtering strainer, thank to which you will not damage the washer by collecting dirt with water. Keep in mind that the container is only used for clean water without detergents intended for cleaning air conditioning.

The washer gun has a nozzle adapted to hard-to-reach places and corners. Its regulation enables precise work even in difficult conditions. The convenience of use is also ensured by the appropriate length of the output cable-up to 5 meters- and a 2.5-meter saturation tube.
